PRODUCT INFORMATION

INFORMACIÓN DEL PRODUCTO

HOW IT WORKS ON TODAY'S TOUGH VIRUSES AND BACTERIA:

The Hydrogen Peroxide (H_2O_2) solution in Kwik-Kleenz MP-HP Cleaner begins working on contact, "oxidizing" the enemy cells (converting to oxygen (O_2) and water (H_2O)) - destroying the essential components of the germ cells and deactivating a wide range of microorganisms, including bacteria, viruses, fungi, and spores.

According to the CDC: Hydrogen Peroxide is effective against a wide range of microorganisms, including bacteria, yeasts, fungi, viruses, and spores. The time required for inactivating three serotypes of rhinovirus using a 3% hydrogen peroxide solution was 6–8 minutes.

In addition, a 2018 study found that Hydrogen Peroxide was more effective in killing some forms of bacteria than the Quaternary Ammonium compounds found in many household cleaning products (Ref. CDC)

When it comes to reducing the germs in your home and containing the spread of coronavirus, Hydrogen Peroxide is a good option to use on inanimate surfaces like metal, glass, and plastic (Ref. American Council on Science and Health).

APPLICATION METHODS:

Spray or mist the Kwik-Kleenz MD-HP Cleaning Solution 6 to 10 inches from the surface. Do not saturate. The solution will begin working on the bacteria in as little as 30 seconds. Allow to air dry or wipe.

The CDC recommends daily applications of products for frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks.

A Ready-To-Use Formula Heavy Duty Cleaning Formula – no mixing or diluting required. Ready for everyday use on multiple types of surfaces: Glass, Marble, Tile, Stainless Steel, Plastic, Painted Surfaces, Carpets and more. As with any cleaning product, always test the product on a small area before wide use to avoid any discoloration or undesirable effect.

Not recommended for use on: Aluminum, Copper, Galvanized Steel and Silver. Remove or cover any items that could be damaged or contaminated during the application (e.g. food, and electronics).

Always practice safe and sensible methods when using this or any cleaning product by wearing gloves and protective eyewear.

INTRODUCING

6 COMMONLY USED APPLICATION METHODS:

- 1. HAND SPRAYER**
(typical household spray bottle)
- 2. PUMP SPRAYER**
(garden type)
- 3. SMALL PUMP ATOMIZER**
(personal size - like a perfume-bottle type)
- 4. COLD ATOMIZER/FOGGER**
(using pressure to create a sanitizing "fog". Droplet sizes around 5 - 50 microns)
- 5. THERMAL ATOMIZER/FOGGER**
(using heat and pressure to create a sanitizing "fog". Droplet sizes 0.5 - 5 microns)
- 6. ELECTROSTATIC SPRAYER APPLICATOR**
(portable sprayer) Droplets sizes approx. 40/80/110 microns.
